

## Heated trucking - winter 2010/2011

When shipping to the Nordic countries, Baltic States, Ukraine, Kazakhstan and Russia during the winter; consideration has to be given to cargo which is susceptible to cold and freezing conditions.

During this period we can supply heated containers (ambient temperature 5° C) which are thermally insulated and heated by a heat producing appliance whilst on the road, port, on the high seas or at one of our distribution centres.

Our containers are technologically advanced and as up to date as possible and are suitable for the food, chemical and pharmaceutical industries.

Heated equipment is available for the following markets.

SWEDEN	All areas
DENMARK	All areas
FINLAND	All areas
NORWAY	All areas
RUSSIA	St Petersburg
RUSSIA	Moscow
ESTONIA	All areas
LATVIA	All areas
LITHUANIA	All areas
KAZAKHSTAN	Almaty, Astana and all major oil fields

Please call Daniel Morrison at Immingham office on 01469 574602 or Chris Littlewood at Halifax office on 01274 675588 for further information.
